

DOE announces update of Community Relations Plan for CERCLA cleanup at INEEL

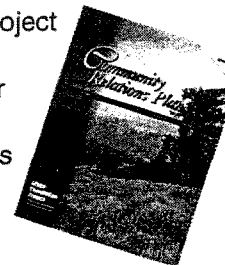

An updated CERCLA Community Relations Plan is available from the U.S. Department of Energy.

The Community Relations Plan is a guide for the public on ways to stay informed and involved in the cleanup process under the Comprehensive Environmental Response, Liability and Compensation Act – known as CERCLA or Superfund. The Community Relations Plan provides background information and a brief history of cleanup work at the INEEL. A draft of the plan was released for public comment last year, and many changes were made based on comments submitted by stakeholders across the state.

The Plan is now available for download on the Idaho Completion Project website at <http://cleanup.inel.gov/remediation/>, or in hard copy. To request a hard copy, contact the Community Relations Plan coordinator at (208) 526-3183, (800) 706-2860 or by e-mail to campjl@inel.gov. Interested stakeholders can always suggest changes and improvements to public involvement activities over the Internet or via postal mail to:
